

Green Initiative

In keeping with our culture and mission we recognize our responsibility to be an eco-friendly organization. Jointly we must be good stewards of this planet and conserve our natural resources. Our green initiative extends from our facilities to our employees and vendors.

We agree to:

- ü Utilize only the most environmentally friendly refinish equipment and products**
- ü Utilize recycled products where possible and practical. (example: computer/copier paper, detail towels etc.)**
- ü Collect & recycle products where possible (example: used computer/copier paper, shipping cardboard, etc.)**
- ü Provide recycle bins in shop and waiting areas for soda bottles and cans**
- ü Recycle unused auto parts where possible and practical**
- ü Continue to conserve and monitor water, fuel, electricity and materials**
- ü Maintain clean and safe work spaces**
- ü Utilize only vendors whom practice good polices on eco-friendliness**
- ü Participate in industry and municipal green initiatives to improve and further our efforts.**
- ü Report any waste and take corrective actions**

Our goal is for 911 Collision Centers to be the most eco-friendly Body Shop organization.
